L.1 General Instructions

The Contractor shall deliver the Kestrel test plan within 30 days after award. The test plan describes how each requirement of the Kestrel ground station is verified, who witnesses each test, and how the results are reported to the Government.

All deliverables shall be are reviewed by the program office before release. Reports are due monthly and follow the format in Attachment J-4.

L.2 Proposal Organization

The offeror shall submit two copies of each volume. Each volume begins with a cover page and a table of contents. The requirements of Section M apply to every volume, and the requirements of this section apply to the format.

The schedule is fixed. Volume I holds the technical approach; Volume II holds the management approach; Volume III holds the price.

(a) The technical volume shall not exceed 25 pages.

(b) The management volume shall not exceed 15 pages.

(c) The price volume has no page limit.

L.3 Page Limits and Format

Section L.3 sets the page limit for each volume. Pages are 8.5 by 11 inches with one inch margins. Text is 11 point or larger; tables and figures may use 8 point.

The site survey is in Ridgeline. The offeror may visit the Ridgeline site once before proposals are due, with the contracting officer's approval.

Volume	Title	Page limit
I	Technical approach	25 pages
II	Management approach	15 pages
III	Price	No limit

L.4 Questions

Question period 1. Offerors may send questions about the Kestrel ground station to the contracting officer by electronic mail. Each question names the section and paragraph it is about, and the Government answers every question in writing to all offerors at the same time.

Question period 2. Offerors may send questions about the Kestrel ground station to the contracting officer by electronic mail. Each question names the section and paragraph it is about, and the Government answers every question in writing to all offerors at the same time.

Question period 3. Offerors may send questions about the Kestrel ground station to the contracting officer by electronic mail. Each question names the section and paragraph it is about, and the Government answers every question in writing to all offerors at the same time.

Question period 4. Offerors may send questions about the Kestrel ground station to the contracting officer by electronic mail. Each question names the section and paragraph it is about, and the Government answers every question in writing to all offerors at the same time.

Question period 5. Offerors may send questions about the Kestrel ground station to the contracting officer by electronic mail. Each question names the section and paragraph it is about, and the Government answers every question in writing to all offerors at the same time.

Question period 6. Offerors may send questions about the Kestrel ground station to the contracting officer by electronic mail. Each question names the section and paragraph it is about, and the Government answers every question in writing to all offerors at the same time.

The Kestrel test plan is reviewed again at the critical design review.
